

ARJUN BHATTACHARYA

Senior Product Operations Leader | Supply Chain & Customer Experience

+91-8826960707 | arjun.bhattacharya@outlook.com | Bengaluru, India | <https://arjun-portfolio-nu-one.vercel.app/>

PROFESSIONAL SUMMARY

Product operations leader with 11+ years of experience translating customer pain points into platform-level fixes, sitting at the intersection of supply chain, product, and customer experience for India's largest e-commerce platforms. Certified in Product Management, with hands-on experience owning CX metrics (CSAT, TAT, SLA), partnering with product and engineering teams to ship system-level fixes, and running structured discovery-to-resolution loops at nationwide scale. Track record of double-digit CX and operational improvements through cross-functional execution. MBA (PGP in Business) from SDA Bocconi, Milan.

CORE COMPETENCIES

- Product Operations & Lifecycle Thinking
- Customer Experience (CSAT, NPS, TAT Optimization)
- Customer Journey Mapping & Pain-Point Diagnosis
- Cross-functional Product & Engineering Partnership
- Data-Driven Decision Making & KPI Dashboards
- Problem Solving & Root-Cause Analysis
- Experimentation & Continuous Improvement
- Agile Road-mapping & Stakeholder Alignment
- SLA & Process Governance Design
- GenAI / LLM Tools for Process Automation

PROFESSIONAL EXPERIENCE

Reliance Retail Ltd — Manager, Supply Chain Growth (Shein)

2025

- Owned customer experience outcomes from the supply chain side of a fast-scaling fashion e-commerce platform, improving CSAT by 25% through structured pain-point identification and resolution with product, CX, and analytics teams.
- Partnered with product and data teams to build dashboards and capabilities that improved visibility into platform performance and accelerated decision-making.
- Worked cross-functionally with CX, Operations, Product, and Marketing to continuously improve the customer journey across delivery and return touchpoints.
- Drove process improvements across logistics and warehouse operations, cutting mind-to-market TAT by 50% and supporting faster product launches.
- Enabled 200% business growth by aligning operational readiness with platform-level demand and customer expectations.
- Built operational capability through structured training programs, lifting SLA adherence from 85% to 97%.

Reliance Retail Ltd — Manager, Control Tower (Ajio Business)

Nov 2021 – Present

- Own the return-journey customer experience for Ajio end-to-end, improving first-attempt pickup success from 72% to 85% through dashboard-driven monitoring.
- Partner with product and tech teams to identify system-level defects affecting customer experience and ship fixes that improve platform reliability.
- Built and maintain data dashboards tracking CX-relevant metrics (TAT, success rates, SLA adherence) used across the org for decision-making.
- Collaborated with CX teams to reduce customer complaints by improving return-process transparency and execution.
- Designed seller and buyer rating frameworks to improve ecosystem-wide trust and reduce return-related defects.
- Led the return-revamp initiative end-to-end: image-based reverse picking, 100% QC checks, and governance frameworks that cut reverse logistics leakages by 40%.

Myntra & Flipkart (Walmart Group) — Associate Manager, Supply Chain

Jul 2019 – Nov 2021

- Collaborated with product and tech teams to build tracking systems and dashboards that improved operational visibility and customer experience.

- Identified operational bottlenecks affecting the customer journey and worked with stakeholders to drive process and system improvements.
- Improved last-mile delayed deliveries from 4% to 1.5% during peak sale events through structured monitoring.
- Improved customer-facing compliance metrics: GRN compliance from 83% to 98%, pick-up compliance from 75% to 93%.
- Released ₹11 Cr of shipments against AOP targets and resolved ₹1.28 Cr in vendor claims through cross-functional dispute resolution.
- Co-created new processes and SOPs with cross-functional product and tech teams for return-to-vendor (RTV) shipments.

Chai Point
— Deputy Manager, Supply Chain Planning

Aug 2018 – Jul 2019

- Used structured demand planning and forecasting to support product and store-launch decisions, reducing procurement costs by 20%.
- Lowered inventory days from 60 to 28, unlocking ₹2.9 Cr in holding-cost savings.
- Supported the launch of 50 stores, 2 warehouses, and 200+ corporate accounts through structured supply and operations planning.
- Implemented the Kraljic Matrix and OTIF vendor-performance frameworks for category-level vendor management.

Arvind Mafatlal Group
— Assistant Manager, Warehouse Operations

May 2017 – Jun 2018

- Managed end-to-end warehouse operations spanning forecasting, GRN, production analysis, quality checks, logistics, and reverse logistics.
- Led a team of 10 executives and 90 contract workers across a 40,000 sq. ft. warehouse facility.

Ericsson
— 2nd Level Engineer, Network Operations

Sep 2012 – Sep 2014

- Resolved 95% of billing issues for Umobile, reducing escalation volume by 70% through root-cause resolution mechanisms.
- Improved Airtel Bangladesh customer experience via structured issue diagnosis and resolution.
